

# Professional Services Through the I-Team

*Delivering Value to Every Phase of Our Clients Engineering Lifecycle*

Cerion Consulting teams combine leading wireless industry experts with operational research scientists and seasoned software architects to deliver best-in-class broadband wireless solutions.

Our expertise and engineering methodologies are leveraged by Tier One Mobile Operators around the world. Our multi-dimensional analyses span technology, equipment vendor and time.

We continually benchmark our recommendations to measure the performance and economic impact after their deployment. We have consistently delivered in excess of two times ROI as verified by our clients.

*Cerion Consultants reduce risk and save expenses*

Strategic & Technology Planning ( 3-5 Years )

Technology Vendor

Capital Planning & Network Design ( 1-3 Years )

Budget Deployment

Network Performance & Network Optimization ( 0-1 Year )

KPI's Algorithms

## Independent Technology Assessments

We advise service providers on the impact of new wireless technology and develop associated engineering methodologies to deliver efficient planning.

## Mobile Broadband Planning

We provide an integrated approach to capital planning and design that can reduce planning cycles from weeks to hours while enabling more dynamic planning.

## Preserving Reputations

Through the development of Intelligent Software Agents, we deliver root cause analysis for performance issues and provide recommendations for corrective actions.

Cerion offers highly trained consultant teams that augments scarce resources, accelerates technology deployment and reduces engineering risk.

Cerion Consulting combines cutting edge mathematical sciences with high performing industry expertise enabling rapid, predictive and precise decisions. These solutions consistently deliver performance improvements and economic efficiencies to our customers. We deliver value to every phase of our clients engineering lifecycle.

*Know the future of your network. Today.*
